
FOLD & FLICK · NIGHT SHADOW

Fold on the dashed lines in number order. Steps are on page 2.
Print at 100% (actual size). Printed side up.

Fold the Night Shadow for real

Fold it. Flick it. Fly it.

1. Take a sheet of printer paper, long side up. Fold it in half the long way, crease it hard and unfold it.
2. Fold the top edge down about 5 cm (2 in). Then fold both new top corners to the center crease.
3. Fold the whole thing in half along the center crease, with the folds on the outside.
4. Fold each wing down, leaving a body only about 2 cm (3/4 in) deep. Big, wide wings.
5. Jet bit (ask a grown-up for scissors): cut a zigzag W along the back edge of the wings, like a stealth flying wing.
6. Open the wings so they sit flat, a little higher at the tips. Hold it under the middle and throw it gently forward and a bit up.

The jet steps use scissors, so ask a grown-up to help.

- Crease every fold hard: run a fingernail along it.
- The numbers on page 1 match the steps. Line 1 is the center crease you fold first and use again later.
- Fly it in Fold & Flick too: it's the Night Shadow in the hangar.
