
FOLD & FLICK · TWIN TAIL

Fold on the dashed lines in number order. Steps are on page 2.
Print at 100% (actual size). Printed side up.

Fold the Twin Tail for real

Fold it. Flick it. Fly it.

1. Take a sheet of printer paper, long side up. Fold it in half the long way, crease it hard and unfold it.
2. Fold both top corners down so their edges meet on the center crease. You get a pointed nose.
3. Fold the whole thing in half along the center crease, with the folds on the outside.
4. Fold each wing down so its top edge lines up with the bottom of the body. Narrow wings, deep body.
5. Jet bit (ask a grown-up for scissors): cut a 3 cm slit forward from the back edge of each wing, 2 cm out from the body. Fold those strips up for twin tail fins.
6. Open the wings so they sit flat, a little higher at the tips. Hold it under the middle and throw it gently forward and a bit up.

The jet steps use scissors, so ask a grown-up to help.

- Crease every fold hard: run a fingernail along it.
- The numbers on page 1 match the steps. Line 1 is the center crease you fold first and use again later.
- Fly it in Fold & Flick too: it's the Twin Tail in the hangar.
